BIM

广州优比建筑咨询有限公司
Guangzhou uBIM Technology Co., LTD.

广州优比建筑咨询有限公司 成立于2010年，在其核心管理团队从2003年开始的BIM研究和应用领域深入耕耘与长期积累基础上，依托广州珠江实业集团有限公司及其全资子公司广州珠江外资建筑设计院平台实现跨越式发展，为城市建设与管理领域提供高水平的BIM战略咨询、BIM项目咨询、境外与BIM Level 2项目咨询、BIM软件研发、企业BIM应用决策、企业BIM生产力建设培训、BIM可视化体验等专业服务。

uBIM Technology was founded in 2010, is a leading BIM technology and industry consultant in China. We specialize in understanding our customers and helping them integrate BIM and digital technologies within their projects, organizations, and cities.

We offer consulting services including BIM implementation, training, BIM content creation, BIM modeling and production, application development services, and configuration services.

Ubiquitous Technology is the authorized training center and Developer of Autodesk. Additionally, Ubiquitous was identified as High-Tech Enterprises by the Guangdong Provincial Department of Science and Technology Agency in 2017.

BIM与建筑行业信息化 BIM and Information Technologies

Handbook for the introduction of Building Information Modelling by the European Public Sector

EU BIM Task Group announces launch date for handbook

4th July 2017 / 0 Comments / in News / by Lauren Tomlinson

引入BIM标志着建筑业数字化时代的到来。

The introduction of Building Information Modelling (BIM) represents the construction sector's moment of digitalisation. It is undisputed that the wider use of technology, digital processes, automation and higher-skilled

onmental future.

Handbook for the Introduction of Building Information

Executive Summary

BIM是建筑业和建设环境数字化转型的核心。

Building Information Modelling (BIM) is at the centre of a digital transformation of the construction sector and the built environment.

This handbook responds to

For public clients

在公共建设领域，BIM可以被认为就是“数字建造”。

For the public sector, BIM can be thought of as 'digital construction'. It is similar to the technology

are addressed
European pu

BIM正在成为基础设施和建造领域的世界语言，预计BIM将成为全球公共基础设施项目的标准。

BIM is becoming a global language for the infrastructure and construction sector, enabling greater collaboration and movement of capabilities across borders. It is predicted that BIM will become the standard for delivering the world's public infrastructure projects. It is, for example, already being used on many of the metro schemes currently in construction around the world.

BIM与建筑行业信息化 BIM and Information Technologies

The screenshot shows the homepage of the Centre for Digital Built Britain. The main navigation bar includes links for Home, About Us, Building Information Modelling, Research Bridgehead, Resources, News, and Events. The 'Building Information Modelling' menu is expanded, showing sub-links for UK BIM Programme, BIM Level 2C, and PwC BIM Benefits Methodology and Report. The 'About Us' section is also expanded. The main content area features a large heading 'Building Information Modelling'. Below it, a red-highlighted paragraph states: 'Building Information Modelling (BIM) sits at the heart of digital transformation across the UK built environment. For the construction industry, a major part of the overall UK economy, it provides a critical opportunity to significantly improve performance and stimulate more innovative ways of delivery and operation.' Another red-highlighted paragraph describes BIM as a collaborative way of working that facilitates early supply chain involvement, underpinned by digital technologies. It explains that BIM provides a digital representation of asset characteristics and supports reliable decision making and management of information throughout its life-cycle. It uses 3D models and a common data environment to access and share information efficiently across the supply chain, boosting efficiency and innovation.

BIM在英国建设环境
数字化转型中位于

BIM的核心是整个供应链
使用模型和公共数据环
境（CDE）有效访问和交
换信息，从而大大提高
建设和运营活动的效率。

BIM技术政策 Policies of BIM

住建部《关于推进建筑信息模型应用的指导意见》(建质函[2015]159号)：到2020年末，以下新立项项目勘察设计、施工、运营维护中，集成应用BIM的项目率达到90%：以国有资金投资为主的大中型建筑；申报绿色建筑的公共建筑和绿色生态示范小区。

Ministry of housing and urban rural development of the people's Republic of China on promoting the application of building information model (JZH [2015] No. 159): by the end of 2020, the proportion of BIM integrated application projects in the survey, design, construction, operation and maintenance of the following new projects will reach 90%: large and medium-sized buildings mainly invested by state-owned funds; public buildings and green ecological demonstration communities that apply for green buildings.

国家发展改革委、住房城乡建设部联合印发《关于推进全过程工程咨询服务发展的指导意见》(发改投资规〔2019〕515号):大力开发和利用建筑信息模型(BIM)、大数据、物联网等现代信息技术和资源，努力提高信息化管理与应用水平，为开展全过程工程咨询业务提供保障。

The national development and Reform Commission and the Ministry of housing and urban rural development jointly issued the guiding opinions on promoting the development of the whole process engineering consulting service (fgzg [2019] No. 515): vigorously develop and utilize modern information technology and resources such as building information model (BIM), big data, Internet of things, and strive to improve the level of information management and application, so as to improve the level of information management and application, and provide reference for the whole process engineering consulting business for protection.

《2016-2020年建筑业信息化发展纲要》建质函[2016]183号：全面提高建筑业信息化水平，着力增强BIM、大数据、智能化、移动通讯、云计算、物联网等信息技术集成应用能力，建筑业数字化、网络化、智能化取得突破性进展。大力推进BIM、GIS等技术在综合管廊、海绵城市、城市轨道交通工程、“一带一路”重点工程中应用。

"2016-2020 construction industry informatization development outline" JZH [2016] No. 183: comprehensively improve the informatization level of the construction industry, focus on enhancing the information technology integration and application capabilities of BIM, big data, intelligence, mobile communication, cloud computing, Internet of things, etc., and make breakthroughs in the digitalization, networking and intellectualization of the construction industry. City's city and rail transit one belt, one road and other key projects will be vigorously promoted by BIM and GIS technologies.

全过程工程咨询服务中如何定位BIM BIM ' Position in Consulting Services

国家发展改革委 住房城乡建设部关于推进全过程工程咨询服务发展的指导意见
the guiding opinions on promoting the development of the whole process engineering consulting service

各省、自治区、直辖市及计划单列市、新疆生产建设兵团发展改革委,各省、自治区住房和城乡建设厅、直辖市住房和城乡建设(管)委、北京市规划和自然资源委、新疆生产建设兵团住房和城乡建设局:

为深化投融资体制改革,提升固定资产投资决策科学化水平,进一步完善工程建设组织模式,提高投资效益、工程建设质量和运营效率,根据中央城市工作会议精神及《中共中央 国务院关于深化投融资体制改革的意见》(中发〔2016〕18号)、《国务院办公厅关于促进建筑业持续健康发展的意见》(国办发〔2017〕19号)等要求,现就在房屋建筑和市政基础设施领域推进全过程工程咨询服务发展提出如下意见。

(二) 建立全过程工程咨询服务管理体系。咨询单位要建立自身的服务技术标准、管理标准,不断完善质量管理体系、职业健康安全和环境管理体系,通过积累咨询服务实践经验,建立具有自身特色的全过程工程咨询服务管理体系及标准。大力开发利用建筑信息模型(BIM)、大数据、物联网等现代信息技术和资源,努力提高信息化管理与应用水平,为开展全过程工程咨询业务提供保障。

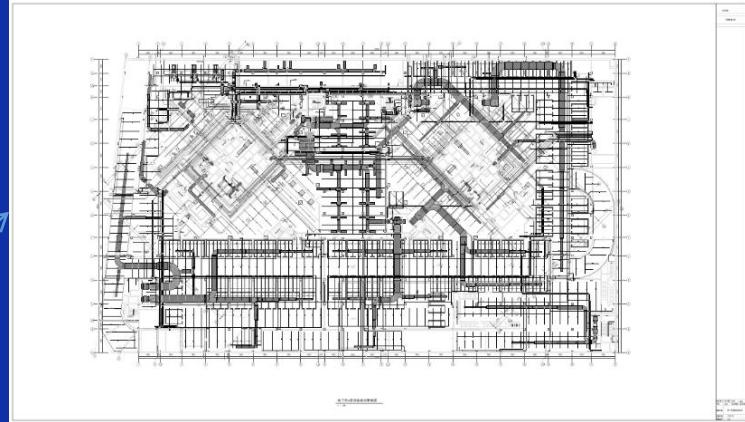

Develop and utilize modern information technology and resources such as building information model (BIM), big data, Internet of things, and strive to improve the level of information management and application, so as to improve the level of information management and application, and provide reference for the whole process engineering consulting business for supporting functions.

The collage illustrates the integration of BIM technology into various aspects of construction management:

- 深化及预制 (Shop Drawings and Fabrication):** Shows a worker using a tablet to view a 3D BIM model of a building's interior, likely for prefabricated components.
- 施工组织设计 (Construction Assistance):** Shows a detailed dashboard for a large-scale residential project, tracking attendance, activity logs, and safety metrics.
- 进度成本管理 (4D and 5D Management):** Shows a mobile application interface for site management, including production monitoring, environmental monitoring, and management tasks.
- 现场综合管理 (Field Management):** Shows another dashboard with a site layout, production progress (282 days remaining), quality issue analysis, and real-time video feeds.
